“Universal Precautions” for Health Care Violence: A Culture Shift

February 15, 2017

Monica Cooke MA, RNC CPHQ, CPHRM, FASHRM

Objectives

- Discuss the reasons for the persistent tolerance for aggression in health care
- Describe the effects of patient aggression on patient/staff safety
- Discuss strategies that promote the culture of zero tolerance and universal precautions for staff

Sound familiar?

“You know, we joke around about it’s not a good day if you haven’t been verbally abused, spit on, or someone’s taken a swing at you.”

“You gotta put people in their place when they yell at you”

“It’s just part of the job...you have to be tough”

National Organizations Speak Out

- The Joint Commission
- Emergency Nurses Association
- National Nurses United
- American Nurses Association
- American Association of Critical Care Nurses
- International Council of Nurses
- American Medical Association
- American Hospital Association
- American Organization of Nurse Executives

Top 10 List of Patient Safety Concerns for Healthcare Organizations

2015

#3 Managing Patient Violence

Failure to Provide adequate safeguards against workplace violence/assaults

California

- State Hospital: \$57,000
- State Hospital: \$38,555

Maine

- Hospital: \$6,300

New York

- Residential Substance Abuse Rehab: \$28,000

Victims

52% of all violence occurs against healthcare workers.

ENA 2011 Nurses Study

- The overall frequency of physical violence and verbal abuse during a seven-day period for full time ED Nurses was 54.5%
- Experienced physical violence: 12.1% and verbal abuse only- 42.5%
- The majority of the victims did not file an event report

Healthcare Sector Leads all Industries in Violence

Occupation	Rate
All Occupations	12.6/1000
Physicians	16.2
Nurses	21.9
Mental Health Professionals	69.9

Per 1000 Employees

2011 National Crime Victimization Survey and The Bureau of Labor Statistics Data

Organizational Factors

- A weak/nonexistent policy
- Inadequate employee acquisition, supervision, and retention practices
- Inadequate training on violence prevention
- No clearly defined rules of conduct
- A nonexistent/weak mechanism for reporting
- Failure to take immediate action

Organizational Costs

- Workers' compensation claims
- Litigation for unsafe work environment
- Increased turnover/absenteeism
- Property Damage
- Need for increased Security
- Overtime or hiring temps
- Effects on recruitment/retention

- The average cost of a homicide is \$850K
- The average jury award for a case of negligence involving violence is approximately \$3M dollars
- The average out of court settlement for negligence lawsuits is \$500K
- Over 1.1M days of lost productivity
- Property damage, diminished public image, credibility
- Security, workforce recovery/wellness= \$ Billions
- 60:1 ratio of cost in terms of aftermath vs. prevention

Impact of Aggression/Violence

- Loss of self esteem and confidence
- Loss of trust of professional abilities/expertise
- Job dissatisfaction
- Elevated stress levels (PTSD)
- Feelings of anger, fear, depression, guilt
- Trauma
- Death

Risk Factors for Violence

- **Alcohol/Drugs/Psych**
- High levels of stress
- Inappropriate staff attitudes
- Long waits for service
- Lack of training
- Limits on drink/food consumption
- Lack of TX options
- Difference in language/culture
- Access to guns
- Lack of staff
- Poor environmental design
- Unrestricted movement
- Poorly lit areas
- Inadequate Security

Risk Reduction/Safety Strategies

“We live in a world where the patient has more rights than the staff and that is beat into us every day”

Leadership Commitment

- Assessment of the organization
- Allocate appropriate authority and resources
- Endorsement and visible involvement
- Demonstrate concern for employees
- Assure managers understand their obligations
- Maintain a system of accountability
- Institute a violence prevention program
- The Patient Experience DOES NOT TRUMP the appropriate management of aggression

Four Universal Precautions for Workplace Violence/Aggression

Violence/Aggression is usually
Predictable and Preventable

First Universal Precaution

Zero Tolerance concept

Culture of Zero Tolerance

- Aggressive/violent behavior is not tolerated (including lateral/vertical/horizontal violence)
- Notification to the community of the Culture of Zero Tolerance
- Established protocols are followed when there is escalation
- Involvement of law enforcement
- Possible termination of patient relationship

OSHA Guidelines

“Employees must be provided a safe and harassment-free workplace”.

*The intent of this regulation **does apply** to violence or aggressiveness on the part of patients and visitors.*

OSHA Recommendations

- Workplace violence program
- Workplace violence controls: administrative and engineering
- Training of staff
- Screening of all patients for violence potential
- System that flags patients with history
- Communication to staff re: violent patients
- Trained Security personnel

Violence Prevention Program

- Establish an uniform reporting system and regular review of reports
- Policy on specific strategies to be instituted system-wide
- Training of staff for violence prevention and post event management

Post Event Support

- Provide comfort and peer support
- Expression of understanding
- Debriefing with staff involved
- Referrals for staff to appropriate resources
- Post incident response and evaluation

Prevention Program Evaluation

- Survey employees
- Evaluate safety/security measures
- Review reports/minutes on safety/security
- Analyze trends relative to “baseline” rates
- Set QI goals to lower the frequency and severity of workplace violence
- Evaluate work practice changes for effectiveness
- Request law enforcement/consultation for additional recommendations for safety

Second Universal Precaution

Recognize escalation
And intervene immediately

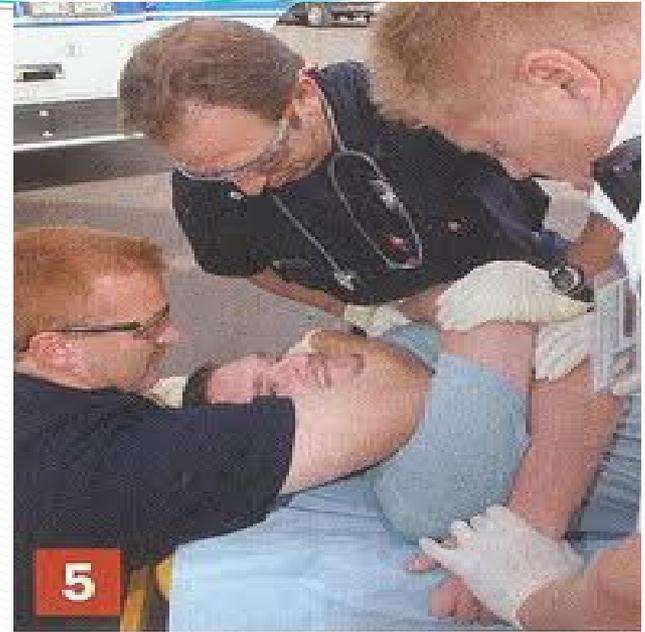

Interventions

- Do not ignore disruption/threats/aggression
- Provide distractions
- Calm, directive approach
- Maintain distance/open egress
- Check body language
- Set limits without humiliation/threats
- Utilize medication

Safety Strategies

- Isolate the person
- Identified “safe” area for staff
- Secured ED entrance & egress
- Use of restraints/seclusion
- Have law enforcement liaison
- Establish a list of restricted visitors/patients

Third Universal Precaution

Institute a Culture of Reporting

Download

Form 127 **Workplace Violence Incident Report Form**

San Diego County requires the completion of this report when incidents that result in a violent act or threat of violence occur in the workplace as outlined in the Workplace Violence Prevention Policy.

Send completed form to Human Resources, Risk Management Office, 1615 Human Resources Plaza 100, or Fax: 951-951-0100. (Forms must be received within 24 hours of the incident.)
HR@SANDCOUNTY.gov or fax

Date of incident: _____ Time: _____
Date reported: _____
Location of incident: _____
Description of incident or Threat (use additional paper if necessary): _____
Name of Perpetrator (if known): _____
Perpetrator's Department/County (if known): _____
Anyone involved: Yes / No / If yes, specify: _____
Name of victim: _____
Department: _____ Phone: _____
Injured: Yes / No / If yes, specify: _____
Witness(es) (Include witness written statement): _____
Occupation: _____
Phone: _____
Law Enforcement Notified: Yes / No / If Yes, Name of Agency and Report Number: _____
Property Damaged: Yes / No / If yes, specify: _____
Corrective Action(s) Taken (Use additional paper if necessary): _____
Recommended Corrective Action(s) (Use additional paper if necessary): _____
Provided Employee Assistance Program information: Yes / No /
Department Representative who completed this form: _____ Phone: _____

Rev. 04/17 San Diego County Administrative Manual

Underreporting Reasons

- Absence of policies
- “Part of the job”
- Poor performance
- Empathy for patient/family member
- Lack of evidence of physical injury
- Shame/fear/threat of further violence
- Lack of supervisor support/fear of reprisal
- Cumbersome reporting mechanisms

Fourth Universal Precaution

Debrief All Events

Debriefing Culture

- Routine
- Constructive
- Non-blaming
- Encourage discussion of the event

Barriers to Debriefing

- Culture: aggression is “part of the job”
- Lack of time
- Lack of administrative support

Additional Strategies for Risk Mitigation

Establish a Rapid Response Team

- Proactive approach to risk mitigation
- Person(s) that can be immediately accessed should a patient, visitor, staff person begin to escalate
- Could be a multidisciplinary team of trained personnel

Ensure Staff Competencies

- Train ALL staff in predicting/identifying aggression and de-escalation techniques
- Competencies for Sitters

Non-violent crisis intervention for:

- Security
- ED Staff
- ICU Staff
- Administrative/Nursing Supervisors
- All staff involved in Crisis Intervention

Additional Training

- Respectful approaches
- Restraint/seclusion
- Workplace violence program

Summary

- Most workplace aggression is preventable
- Institute a strong, comprehensive violence prevention program focused on zero tolerance
- Use an interdisciplinary team approach
- Mandate reporting
- Collect data and set improvement goals
