DELIVERING QUALITY WITH DISTINCTION

2012 Quality Excellence Achievement Awards

OVERVIEW

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Reaching Zero Central Line-Associated Infections by Improving Compliance to Aseptic Technique*

Summary: Central line-associated bloodstream infections continued to occur in the adult Intensive Care Unit despite the implementation of the Institute for Healthcare Improvement's Central Line Bundle. Compliance with central line bundle was high, yet observations revealed breaks in aseptic technique during skin preparation, line insertion and port access.

Collaboration between infection prevention and IV therapy revealed that the kits used for dressing changes and port access needed to be configured to support compliance with aseptic technique. After staff education, collaboration with the dressing change kit vendor and staff commitment to patient safety, the rate for the adult medical/surgical Intensive Care Unit has remained at zero for 17-consecutive months.
