DELIVERING QUALITY WITH DISTINCTION

2012 Quality Excellence Achievement Awards

OVERVIEW

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Timely Discharges and Reducing Readmissions*

Summary: Good Samaritan Regional Health Center's medical unit required 4 hours, 18 minutes to discharge an inpatient once the discharge order had been written. A CQI+ team was sanctioned to reduce that time. The team used Lean/Six Sigma process improvement strategies to decrease both the hospital's inpatient readmission rate and its inpatient discharge order-to-door time.

Discharge order-to-door time has been reduced in half and the improvement has been replicated hospital-wide. The unit has also realized readmission rate reductions. The March 2011 readmission rate of 17.68% for AMI/CHF/Pneumonia/COPD was reduced to 9.33% by April 2012. The hospital's readmission rate for AMI/CHF/Pneumonia/COPD also has been reduced.
