DELIVERING QUALITY WITH DISTINCTION

2012 Quality Excellence Achievement Awards

OVERVIEW

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Foleys Aren't Fun: A Hospital Leadership Team's Journey to Reducing Catheter-Associated Urinary Tract Infections (CAUTIs)*

Summary: After identification of an opportunity to reduce CAUTIs, leadership headed an initiative to reduce the incidence of infection and foley utilization. A drive for improvement was managed by nursing leadership by instituting safety huddles, completing daily review of foley utilization, and implementing standard of care guidelines for foley indication.

The awareness, discussion and culture change, allowed the hospital to reduce their CAUTI rate from 2.0 (3rd quarter 2011) to .29 (1st quarter 2012) and decreased percent unnecessary urinary catheters from 24.7% (3rd quarter 2011) to 9.5% (2nd quarter 2012).
