DELIVERING QUALITY WITH DISTINCTION

2012 Quality Excellence Achievement Awards

OVERVIEW

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Surviving Sepsis Campaign*

Summary: The purpose of the project was to improve the recognition and early goal directed treatment of patients with sepsis to reduce mortality rates by 50% in one year from implementation. The hospital used multi-point strategies provided by the Surviving Sepsis Campaign (SSC) to help guide practitioners in the recognition and treatment of these critically ill patients providing an opportunity for a positive outcome.

Since implementation, overall compliance with the four elements of the sepsis resuscitation order set increased from 34.6% to 90.7%. The mortality rate decreased to an overall 16% since implementation from a baseline of 42%.
