## 2012 Quality Excellence Achievement Awards

### OVERVIEW

---

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

### AWARD FINALISTS

---

#### Rural/Critical Access category

##### **Gibson Area Hospital & Health Services, Gibson City**

*Reduce Medication Errors Through the Implementation of Computerized Physician Order Entry (CPOE), Medication Bar Coding and Smart Pump Technology*

##### **Graham Health System, Canton**

*Intensive Care Management*

##### **St. Mary's Hospital, Centralia**

*Reducing Readmissions CQI+ Team—Implementing Change Through the IHA Project RED Collaborative*

#### Urban category

##### **Advocate Hope Children's Hospital, Oak Lawn**

*Utilization of an Interdisciplinary Team Approach for the Care of Infants with Hypoplastic Left Heart Syndrome (HLHS)—The Ideal Quality Improvement Collaboration*

##### **Alexian Brothers Health System, Arlington Heights**

*Improvement in Patient Safety and Quality of Inpatient Care Through Appropriate Blood Product Management*

##### **Holy Family Medical Center, Des Plaines**

*Collaborative Approach to Reduce Health Care-Acquired Clostridium difficile Infection Rate in a Long-Term Acute Care Hospital (LTACH)*

The following pages contain summaries of the award finalists' projects.

Project Title: *"Patient-Centered Value through Pharmacy-Led Interventions"—Goal is to Achieve 100% Compliance with Antibiotic Selection and Timing, and Sustain Performance*

Summary: In late January 2012, pharmacists began reviewing potential pneumonia patients using a screening tool developed by the quality management team. A list of patients with diagnosis codes that had previously been identified as possible pneumonia patients prints twice daily. Pharmacists review each patient on this list for CMS inclusion criteria based on their admitting diagnosis, physician history and physical, emergency department records, and progress notes.

If the patient is determined as a possible community-acquired pneumonia patient, the antibiotics are reviewed for appropriateness. When a patient has been identified as not being on the appropriate antibiotics, the physician is called and requested to change therapy.

Since implementing this process, the hospital has achieved 100% compliance on antibiotic selection and timing for pneumonia patients.
