DELIVERING QUALITY WITH DISTINCTION

2012 Quality Excellence Achievement Awards

OVERVIEW

The Illinois Hospital Association's (IHA) Institute for Innovations in Care and Quality (The Institute) second annual Quality Excellence Achievement Awards recognizes and celebrates the achievements of Illinois hospitals that are committed to transforming Illinois health care through innovative approaches and best practices.

From 67 submissions representing 40 hospitals, awards were presented to a total of eight hospitals in two categories: urban and rural/critical access. The two award recipients and six finalists, who were honored at IHA's annual Leadership Summit, were selected by a panel of 30 nationally-recognized quality improvement leaders based on their achievement and progress in advancing one or more elements of the Institute of Medicine's six aims for improvement:

- Safety
- Effectiveness
- Timeliness
- Efficiency
- Equity
- Patient-centered care

To share these initiatives among members, The Institute has published this compendium that provides a synopsis of all award entries along with contact information for additional details. The compendium receives national exposure by being featured annually on the Hospitals in Pursuit of Excellence (HPOE), an AHA affiliate, website.

Project Title: *Reducing Readmissions CQI+ Team-Implementing Change Through the IHA Project RED Collaborative*

Summary: The all-cause 30-day readmission rates for the hospital are higher than both the state and national average for all three quality indicators (AMI, CHF and community-acquired pneumonia). In January 2011, the hospital started a new CQI+ team to implement the Illinois Hospital Association (IHA) Project Re-Engineering Discharge (RED) Collaborative.

Working through the CQI process steps, sub-teams created process maps for each of the six target areas: medication reconciliation, patient/family education, internal and external communication, after-discharge follow-up, discharge instructions, and RED implementation.

Patient follow-up included a minimum of five phone calls during the 30-day post-discharge period. Health coaches generally make one home visit and often attend physician appointments with the patient in order to create seamless care coordination and ensure that the discharge plan of care is carried out. As a result, readmission rates in all categories are trending downward.
