

# AHAWORKFORCE

Health care is people caring for people with great skill and compassion. Hospitals and health systems recognize that the people who work in their organizations are truly the heart of that health care. AHA has created a workforce compass that provides a digital framework organized around four key areas to better connect leaders and staff to the resources they need.

- ▼ **Communities** | Resources dedicated to creating a culture of safety, increasing joy and meaning to work, strengthening diversity, preventing violence and improving staff experience with technology.
- ▼ **Competencies** | Resources to develop staff skills and capabilities needed for today's transformative workplace and tomorrow's health care delivery.
- ▼ **Capacities** | Resources to recruit, retain and grow a workforce ready for new care models and fostering health.
- ▼ **Catalysts** | Resources focused on the future of health care, specifically new technologies, disruptive innovation and different models of care delivery.
