CISA Releases Analysis Reports on New FiveHands Ransomware

TLP:WHITE

May 06, 2021

The United States Cybersecurity and Infrastructure Security Agency (CISA) has posted the Current Activity "[CISA Releases Analysis Reports on New FiveHands Ransomware](#)".

CISA is aware of a recent, successful cyberattack against an organization using a new ransomware variant, known as FiveHands, that has been used to successfully conduct a cyberattack against an organization.

CISA has released [AR21-126A: FiveHands Ransomware](#) and [MAR-10324784-1.v1: FiveHands Ransomware](#) to provide analysis of the threat actor's tactics, techniques, and procedures as well as indicators of compromise (IOCs). These reports also provide CISA's recommended mitigations for strengthening networks to protect against, detect, and respond to potential FiveHands ransomware attacks.
