# FINISHED INTELLIGENCE REPORTS

HC3 May 2021 Cybersecurity Vulnerability Bulletin

TLP:WHITE   Jun 11, 2021

In May 2021, vulnerabilities in common information systems relevant to the healthcare sector have been disclosed to the public and warrant attention. This includes the Patch Tuesday vulnerabilities – released by several vendors on the second Tuesday of each month – as well as ad-hoc vulnerability announcements including mitigation steps and/or patches as they are developed. Vulnerabilities this month are from Microsoft, Adobe, Intel, SAP, Cisco and Apple. These vulnerabilities should be carefully considered for patching by any healthcare organization with special consideration to each vulnerability criticality category against the risk management posture of the organization.
