

# FINISHED INTELLIGENCE REPORTS

## HC3: Monthly Cybersecurity Vulnerability Bulletin

TLP:WHITE

Aug 19, 2021

In July 2021, vulnerabilities in common information systems relevant to the healthcare sector have been disclosed to the public and warrant attention. This includes the Patch Tuesday vulnerabilities – released by several vendors on the second Tuesday of each month – as well as ad-hoc vulnerability announcements including mitigation steps and/or patches as they are developed.

Vulnerabilities this month are from:

Microsoft  
Adobe  
SAP  
Cisco  
Apple

These vulnerabilities should be carefully considered for patching by any healthcare organization with special consideration to each vulnerability criticality category against the risk management posture of the organization.

For full report details please review the provided attachment.
