HC3 – Sector Alert: VMware Vulnerabilities

H-ISAC®
HEALTH - ISAC

TLP:WHITE

Sep 22, 2021

On September 21, 2021, VMware disclosed numerous vulnerabilities affecting their vCenter Server and Cloud Foundation products, some of which could be exploited for the deployment of ransomware or other malicious activity. Working exploits have already been detected and additional exploits are highly likely to become available soon. VMware recommends that customers install available updates, patches, or workarounds immediately to mitigate these vulnerabilities in affected VMware products.

For full report details, please see the provided attachment.
