The Honorable David McKinley, P.E.
United States House of Representatives
2239 Rayburn House Office Building
Washington, DC 20515

The Honorable Lucille Roybal-Allard
United States House of Representatives
2083 Rayburn House Office Building
Washington, DC 20515

The Honorable David Joyce
United States House of Representatives
2065 Rayburn House Office Building
Washington, DC 20515

Dear Representatives O'Halleran, McKinley, Roybal-Allard, and Joyce:

On behalf of our nearly 5,000 member hospitals, health systems and other health care organizations, our clinician partners – including more than 270,000 affiliated physicians, 2 million nurses and other caregivers – and the 43,000 health care leaders who belong to our professional membership groups, the American Hospital Association (AHA) writes to express support for your legislation, H.R. 5699, the Student Assisted Vaccination Effort (SAVE) Act.

This year, a key barrier to rapid vaccine dissemination has been the availability of a sufficient workforce trained to administer them. The AHA supports allowing additional provider groups to deliver vaccines—as long as they are appropriately trained, and as necessary, have appropriate supervision when administering the vaccine. Vaccine providers must be able to identify any recipients who are at risk for anaphylaxis, and necessary personnel should be onsite to administer appropriate treatment if a vaccine recipient has an antiphyllactic reaction.

Your legislation would expand the types of providers covered by the PREP Act and offer them appropriate legal protections for the deployment of countermeasures during public health emergencies. Hospitals and health systems stand ready to offer assistance to schools with the administration of vaccines under this approach.

The AHA welcomes the opportunity to collaborate on the advancement of the SAVE Act, and we look forward to serving as a resource to you and your staff on this legislation and other health workforce matters.

Sincerely,

/s/

Stacey Hughes
Executive Vice President
